

CONCEPT TRAINING PROGRAM

LEARN THE CONCEPT.

From concept to execution — a practical training and mentorship program built for disciplined market participation.

NOT A THEORY CLASS. A PRACTICAL SYSTEM.

The five-day concept training moves learning toward application from the first session. The three-month mentorship then keeps the process active through community access, live market sessions and structured review.

CONCEPT → EXECUTION → REVIEW → DISCIPLINE

THE LEARNING LOOP

01

LEARN THE CONCEPT

Each idea is introduced through the chart, not through a slide deck — market structure first, terminology second.

02

SEE THE APPLICATION

Concepts are demonstrated on live market conditions so the reasoning behind every decision stays visible.

03

EXECUTE

Order types, entries, stops and sizing are practised in a monitored environment rather than described in theory.

04

REVIEW

Every trade is logged and reviewed in JournalX, turning individual outcomes into a measurable process.

THE GOAL

Build a repeatable decision-making process — rather than depend on isolated information.

FIVE DAYS. ONE SYSTEM.

Non-theory, practical sessions. Each day closes one part of the framework and opens the next.

DAY

01

FOUNDATIONS & MARKET STRUCTURE

Market structure, key terminology, chart reading and understanding how financial markets operate.

DAY

02

RISK MANAGEMENT

Position sizing, stop-loss placement, reward-to-risk ratios and capital protection.

DAY

03

CONCEPT FRAMEWORK

The 10X Trader concept framework — entry signals, confirmation tools and high-probability setups.

DAY

04

TRADE EXECUTION & LIVE APPLICATION

Live trades, order types, execution techniques and practical application in real market conditions.

DAY

05

TRADING PSYCHOLOGY & MINDSET

Fear, greed, impulsive decisions and the emotional discipline that holds a process together.
